

GAME PLATFORM MANUAL

Table of content

Language selection.....	3
Module selection	4
Character selection	5
Game selection	6
Download for offline use.....	8

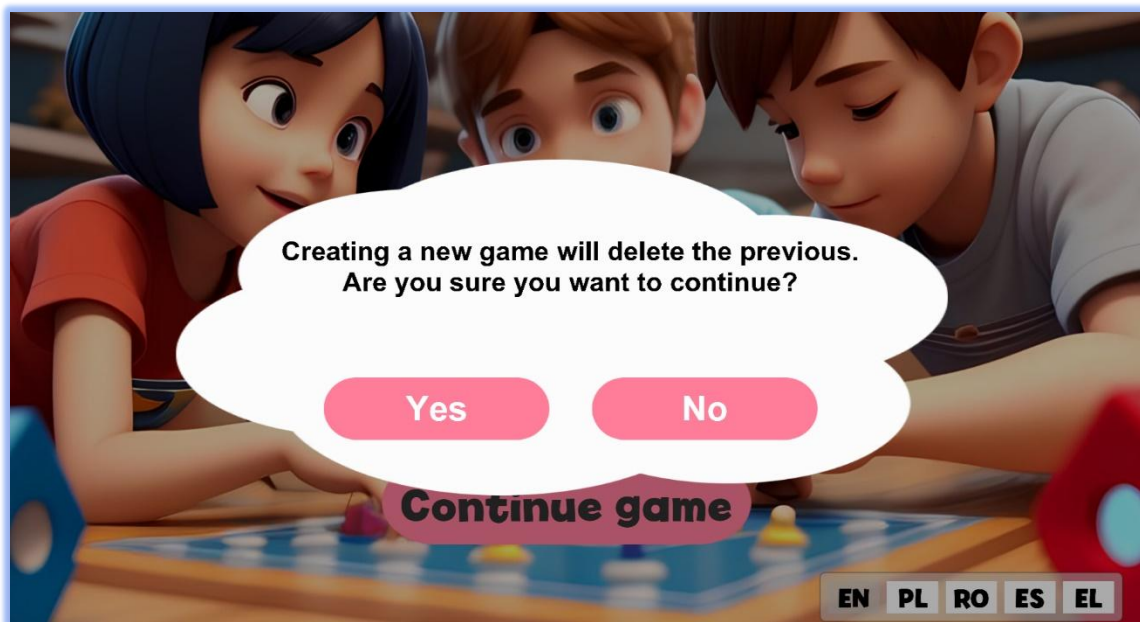

Language selection

After the platform has loaded, you can select your preferred language using the menu in the bottom right corner.

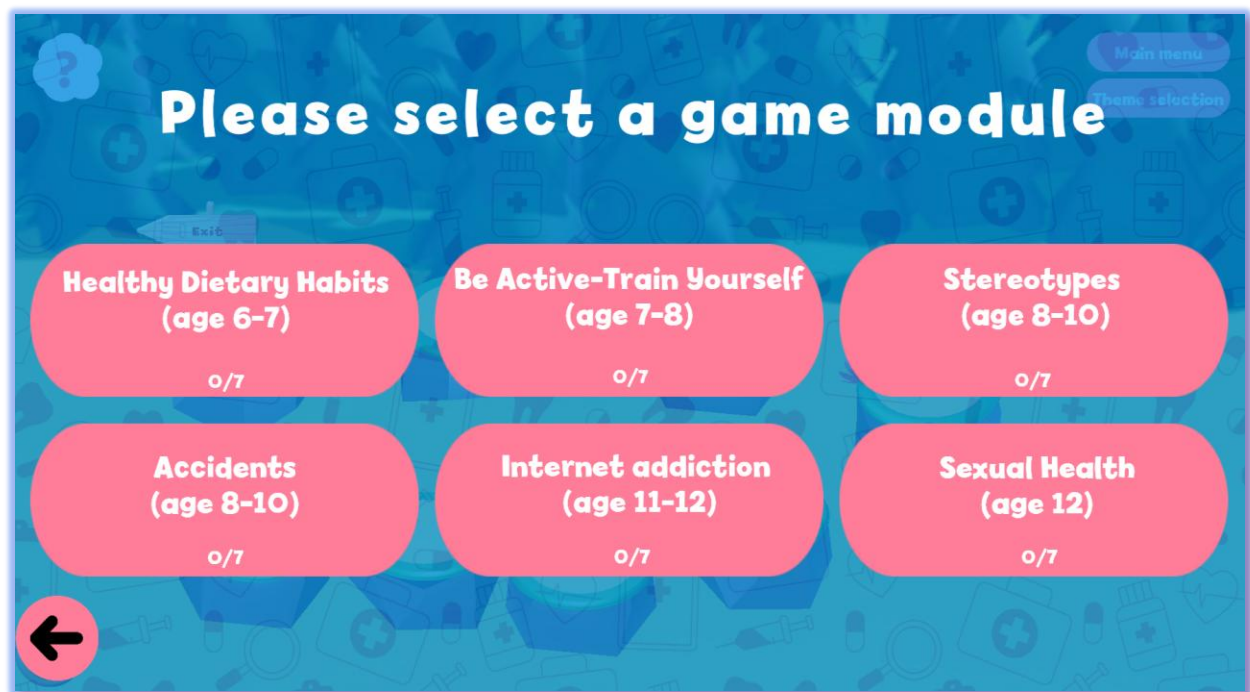

Press either "New Game" to start a new adventure or "Continue" if you have already begun one. Your progress is saved in your browser's cache.

Creating a new game will erase your existing progress to start fresh.

Module selection

The platform's games are divided into six (6) different modules:

- Healthy Dietary Habits
- Be-Active-Train Yourself
- Stereotypes
- Accidents
- Internet Addiction
- Sexual Health

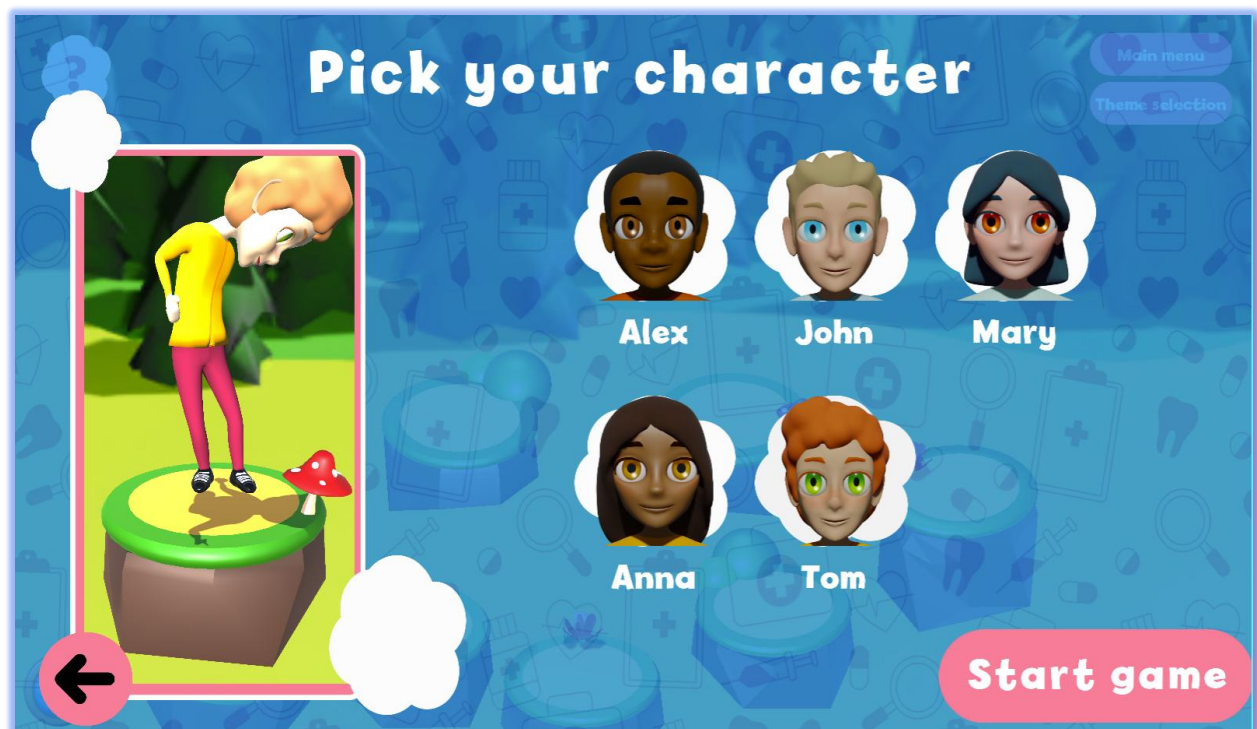

For each module, you can view the recommended age. The game's content, difficulty, and available games change depending on the selected module.

In the module selection window, you can view each module's title and the player's current progress. Once a game is completed, progress will update from 0/7 to 1/7, then 2/7 etc..

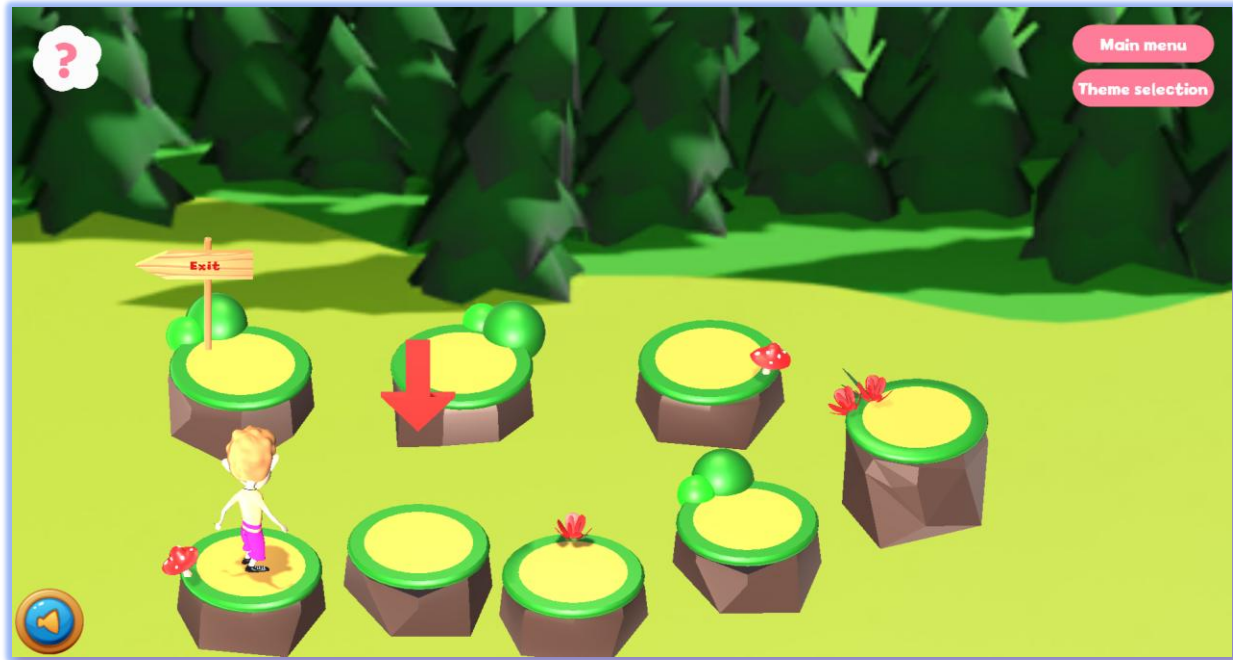

Character selection

In the character selection screen, you can choose a character (between 5 different) to start the adventure. The character's age adjusts according to the module's recommended age.

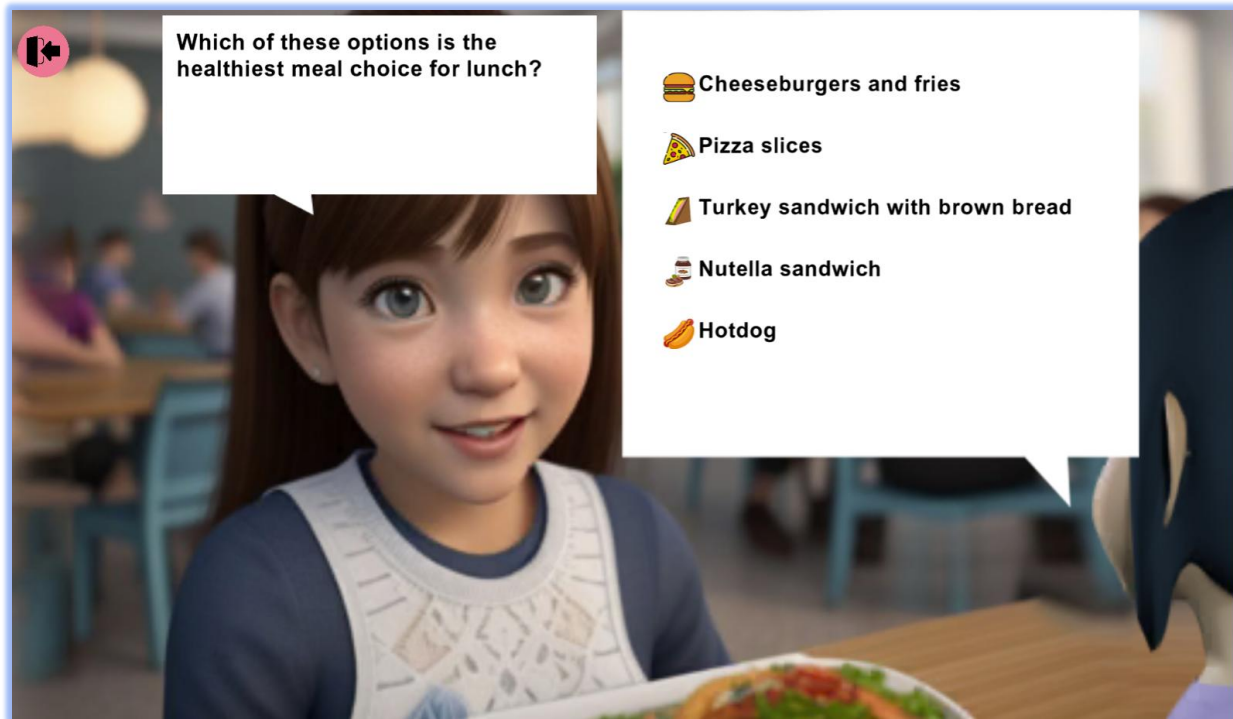

Game selection

Each module consists of 4 to 7 different games. You can select a platform, view the game's description and instructions, and start playing. You can return to any completed platform by clicking on it.

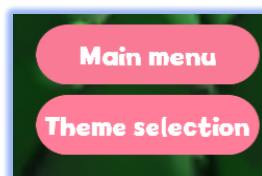

You can exit any game using the exit button on the top left corner of the game.

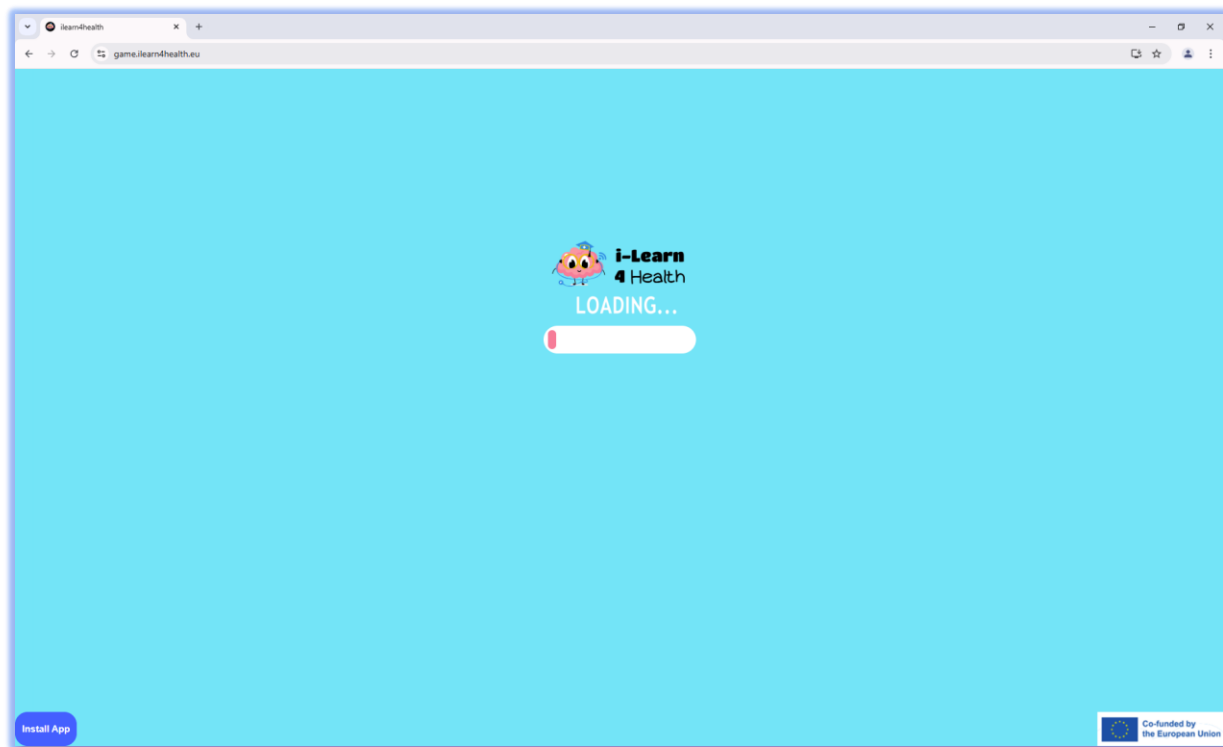

You can pause the game at any time and view the instructions by clicking the question mark symbol in the top left corner.

You can always return to the main menu or module selection via the main menu and theme selection buttons in the top right corner of the game view.

Download for offline use

You can press the "Install" button to download the platform and its files to your device. This will create a shortcut on your device and store all online files, allowing you to use the platform without an internet connection.
